

# **BEST PUF CHEMICALS SUPPLIERS IN HARYANA**

# HAVING A MONTHLY PRODUCTION CAPACITY OF MORE THAN 250 METRIC TONNES

We have multiple chemical reaction kettles, which help us to maintain our operational efficiency during high demands.

Consistent quality due to large production batches and multiple quality inspections.

Efficient delivery schedules due to coherent production and sales processes.

24/7 technical support due to industry-wide knowledge and experience.

## **PROVIDING CFC FREE SOLUTIONS TO ALL POLYURETHANE PROBLEMS**

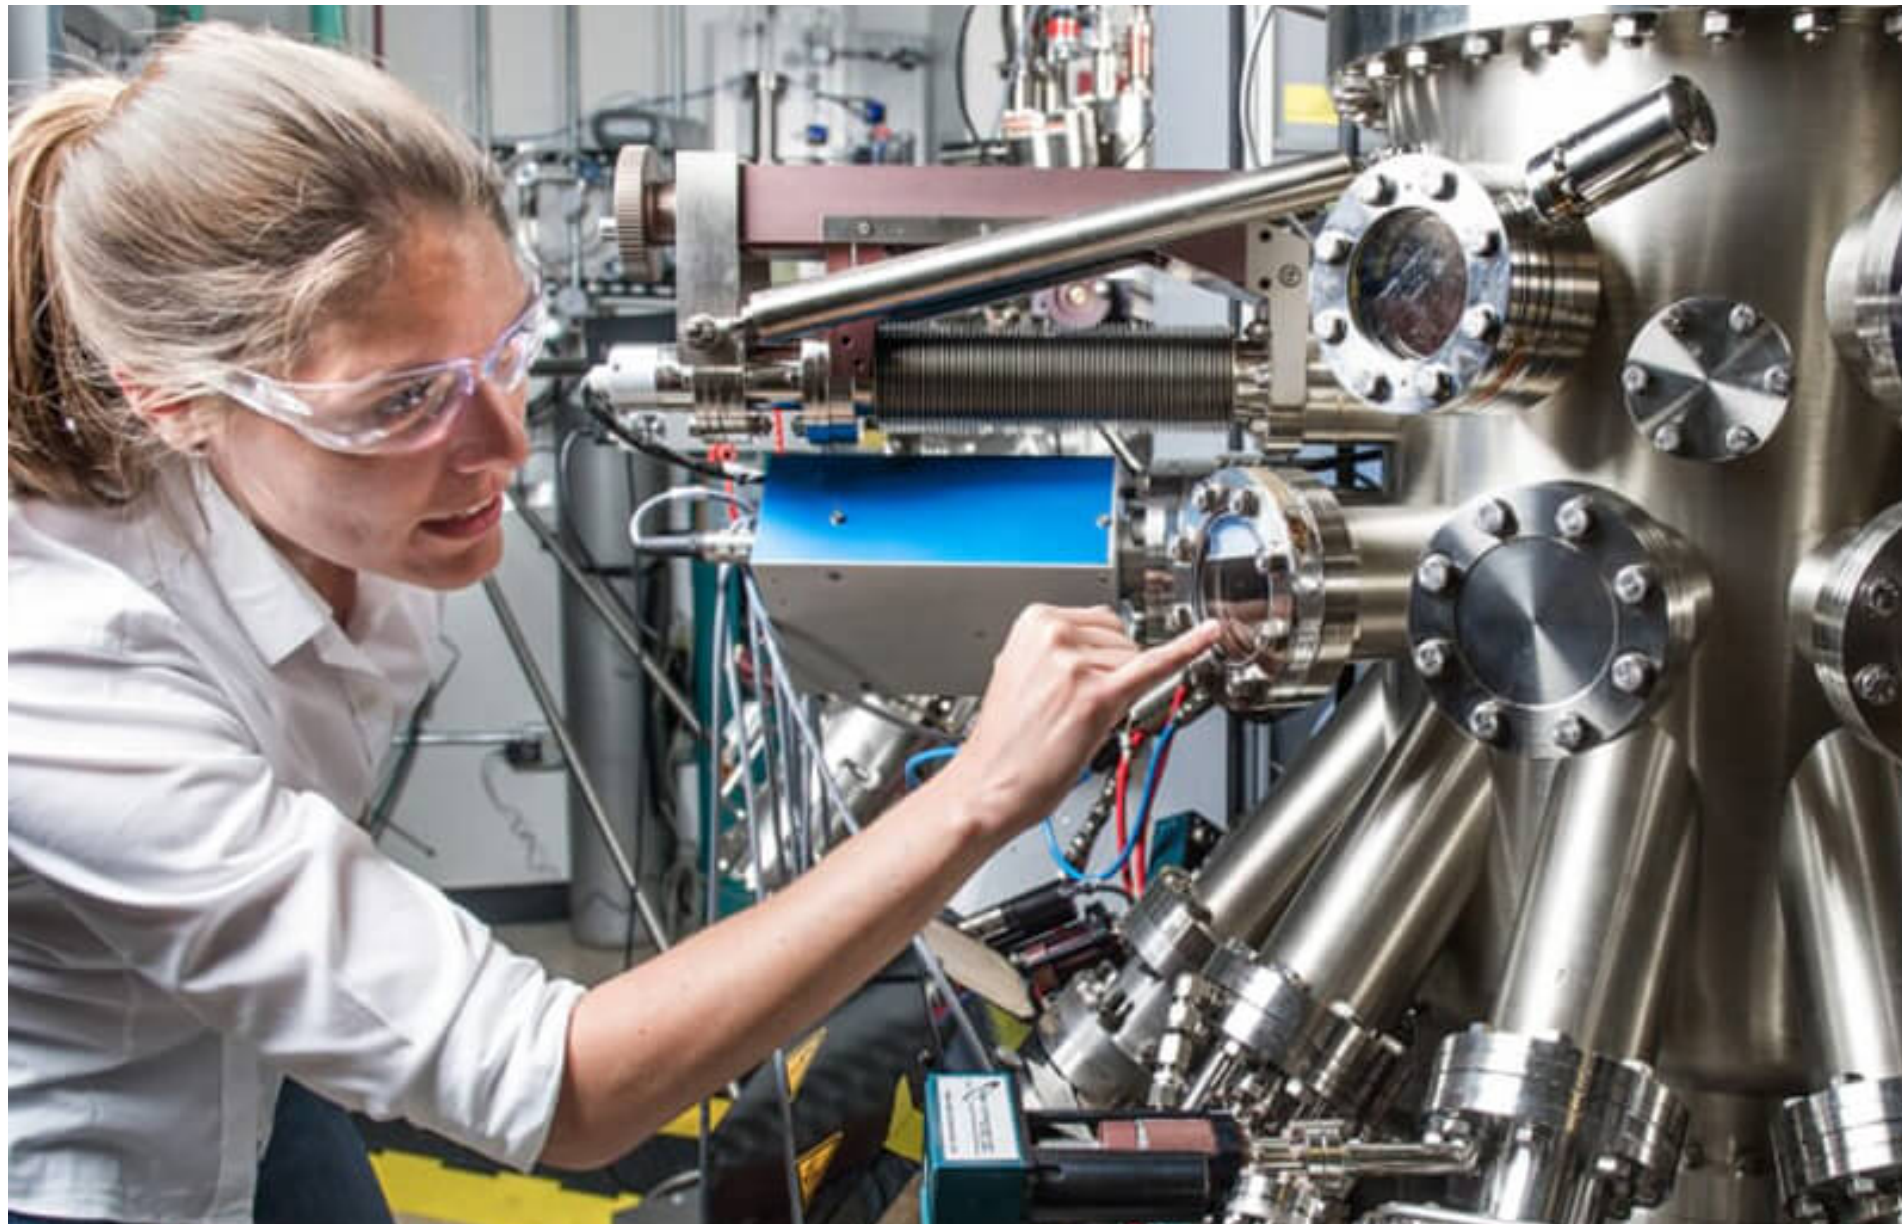

As the use of blowing agent HCFC 141B was prohibited under the Montreal Protocol, which was implemented in India on 31st December 2019, we revamped our polyurethane system with eco-friendly alternates.

Stable and easy to use our in-house SIPANE™ blown systems.

Efficient water blown systems for select applications.

Incorporated methyl format and HFCs in different polyurethane polyol systems.

We understand each customer's pain points, applications, and exact requirements, and we deliver keeping all of that in mind.

The foam free-rise and core densities can be adjusted.

The reaction times such as cream, gel, and rise can be adjusted.

The polyol isocyanate mixing ratio can be adjusted for select applications.

Every other application or machinery may require different chemical properties for corrective operational efficiency. It is up to the customer to notify us and get the best out of our capabilities.
